## Maintenance Plan

Quizzical is a web app and is made to be easily expandable and low maintenance. However, we still have an extensive maintenance plan to ensure a satisfactory user experience. Moving forward, we will fix any bugs that may arise by pushing regular software patches. Third-party APIs may update and cause issues down the road, and these will be corrected as they are brought to our attention. In addition to maintaining the functionality of the app, we will also be adding new functionality. We recognize that the app could benefit from enhanced features and will be working on them long after the initial release.
